IDP @ Co-mind
Join us in building the next-generation Secure & Private AI + GenAI Agent Platform.

Access our partner programs: Nvidia Inception, Microsoft Founders Hub

Co-mind.ai is building the future of private and secure GenAI – a powerful platform where you can create your own AI agents using open-source models, all without sending data to the cloud. We're a fast-moving startup on a mission to put cutting-edge AI in the hands of developers, students, and innovators – securely, responsibly, and at scale.

Project Scope: Full-Stack Developer

Join us in building a turnkey enterprise AI platform. As a full-stack developer, you'll work across the stack to deliver real product features. Your key responsibilities include:

- Developing frontend and backend components using Node.js + TypeScript, Python
- Designing and implementing core APIs, endpoints, and SDKs
- Enhancing enterprise-grade authentication with organization-level and role-based access control

Your Profile

- Master's student at TUM CIT (Informatics or a related field)
- Confident in JavaScript/TypeScript full-stack development
- Experience with Next.js, Node.js, and Express.js
- Able to work independently, learn quickly, and enjoy shipping real features

Why Join Us?

- Work in a small, focused team (2–4 Master's students – ideal for an IDP; individual applications also welcome)
- Flexible format: 20 hrs/week over 6 months (part-time) or full-time for 3 months
- Start anytime – latest by 01 September 2025
- Collaborate with experienced founders from diverse backgrounds
- Contribute to solving real-world AI privacy and security challenges
