

ABOUT US

PRIO Hotels specializes in revitalizing smaller existing, privately-owned hotels facing challenges from the pandemic and inflation. We take over these properties, employing strategic IT solutions and centralized management to ensure their future viability. Our mission is to create sustainable solutions for small, independent houses, not run by big hotel chains, fostering a resilient and prosperous future for these unique establishments.

One of the essential tools required to realize this vision is an efficient management software. Since current solutions lack efficiency due to low reliability and usability, we aim to come up with our own application to enhance the efficiency of our daily work

YOUR PROFILE

- ✓ Group of 1-3 highly motivated students with flexible time management
- ✓ Experience with modern Javascript frameworks like React
- ✓ Proficient in RESTful APIs and frameworks, such as NodeJs
- ✓ At least average Git knowledge for effective version control
- ✓ Strong focus on designing intuitive UI/UX for a better user experience
- ✓ Self-organized with an engaging work ethic

YOUR TASKS

Full Stack Development of a Management Software Suite for the hotel industry, including:

- Reservation and Booking management
- Check-in and check-out process
- Room management
- Billing and invoices
- Guest profiles
- Ensure mobile responsiveness for usability on different devices
- Prioritize an excellent UI/UX design for easy use, even for inexperienced users
- Preferably implement using the MERN-Stack (MongoDB, Express.js, React, Node.js)
- Codebase should be designed to be easily extensible
