

Backend developer for AI/HR rocketship 🚀

What are we looking for?

- Curious, motivated students ready to explore the startup hustle
- A willingness to learn, good communication skills, and solid programming experience.
- Experience using LangChain a plus, we're flexible with the language you use, but should be able to understand Python.
- Both German and English speakers are welcome.

Project tasks and goals

- Work with us to build a hierarchical structure out of PDF documents either using AI tools, or classical programming methods
- The goal is to output a tree structure, similar to HTML for the PDF given.
- Using either AI tools, or classical programming

What we offer

- Daily support and discussion with our student founders, ex-leaders of TUM AI and START Munich
- Freedom to learn, explore and grow your skills
- Opportunities to stick around post-project as a working student, intern or for a Master's thesis
- Flexible start dates between November and January

Interested?

- Ready to jump into an exciting coding project?
- Slide your CV, cover letter & proposed start date to contact@teamdynamicsai.com

About us

At Team Dynamics AI, we're all about using smart AI to simplify HR tasks. We are a young startup, founded by three pals with a knack for tech and a vision to shake things up in the HR world. We're building not just a cool product, but a fun place to explore, learn and make a real impact.

TONI - Business Lead and Ex-President Start Munich

IAN - AI Lead and Ex-President TUM.ai

KILIAN - Tech Lead and Ex Startup CTO
