

# IDP at a sustainability start-up (f/m/x)

## Who we are.

Wannatree is an early-stage start-up with a mission to enable everyone to make a positive impact on our planet quickly, easily, and at no cost. This is achievable as our local and online partner shops finance the planting of trees for purchases exceeding a certain amount, benefiting the environment and enhancing customer loyalty. Furthermore, our partners are featured on our platform and mobile app, allowing them to showcase products on our product marketplace to attract new customers.

## What we are looking for.

Our partners already offset CO<sub>2</sub> every day. Our current focus is on scaling our platform to achieve a significant impact on our climate. We are seeking dedicated students to join us in this mission and do their Interdisciplinary Project with us. Previous experience in JavaScript, Svelte, Linux, Python, Git or participation in the iPraktikum is preferred. Remote working is possible. Available topics are:

### A) Web-App Development (Frontend & Backend)

-  Elevate the usability of our product marketplace through the integration of new features
-  Implement community elements like a feed, user interactions, rankings, and gamification

### B) Customer Relationship Platform Development

-  Streamline the sign-up process for new shops through Customer Onboarding Automation
-  Work on tools for our customers to keep track of their relevant KPIs

### C) Mobile App Development (IOS / Android)

-  Develop new features for our mobile app, focusing on a seamless customer experience
-  Integrate further features from the web-application into the mobile app

## What we offer.

Join an early stage start-up with the mission to fight climate change in a creative way. You will be able to develop and implement your own ideas and features using modern technologies and test them immediately with a real user base. You can closely collaborate with founders and contribute to the growth of a young company.

## Next steps.

If you are interested, please send us your CV, transcript and a short (!) note stating in what topic and why you are interested. Please include if you apply individually or as a team. Contact: [janick@wannatree.de](mailto:janick@wannatree.de)
