NeuroSense.

IDP | AI BASED DOCUMENT PROCESSING PIPELINES FOR ELITE LAW FIRMS

ABOUT |

Join NeuroSense through an IPD, where you are invited to push the boundaries of AI technology and legal software development. We offer a platform for the most ambitious minds to explore, develop, and refine technology solutions that address real-world challenges in mass litigation.

PROJECT |

Join our project to revolutionize data processing pipelines, a key initiative where you will contribute to designing and developing an intuitive interface, enhancing user experience, and integrating our own machine learning models. This project challenges you to devise abstract solutions tailored to the specific needs of our customers, including some of the most elite law firms. Your work will directly impact the legal industry, offering you a unique chance to innovate alongside a team dedicated to setting new standards in legal tech.

YOU |

Required Skillset & Tech Stack:
- **Passion for Innovation**: Seeking technically adept individuals with a zeal for crafting solutions and assuming project ownership.
- **Proactive & Decisive**: A hands-on approach with swift decision-making capabilities.
- **Core Technologies**: Proficient in React (Flow), Python, Django, Javascript
- **Cloud & Database Expertise**: Experience with GCP (including Vertex AI, Cloud Functions), Firebase, and Neo4J.
- **Adaptability**: Comfortable navigating and integrating a broad range of technologies.
