

About us

Caplend revolutionizes the financial landscape by providing a **blockchain infrastructure** for selling and buying trade receivables.

Our platform facilitates **direct connections** between originators and investors, eliminating intermediaries and streamlining the process. With Caplend, businesses gain access to efficient, flexible, and cost-effective **financing solutions** while investors discover new ways for allocating capital.

We use blockchain technology to make trade receivables financing transparent, secure, and compliant with regulations.

This brings a new level of **speed, flexibility, and efficiency** to the process.

Project

For our pilot, we have initial customers and investors eager to participate. Our focus is on building our **first MVP**, integrating with external partners (wallet providers, stablecoins, bank accounts), and creating a **sleek frontend**.

This involves implementing **UI/UX designs** for user onboarding, receivable listings, and dashboard visualization.

We'll conduct **user testing**, iterate on features, and eliminate bugs. The goal is to launch a functional MVP, enabling our first revenue stream.

Tasks

- Create intuitive, visually appealing, and responsive web interfaces using **React**
- Translate design mockups and wireframes into **web components**
- Enhance the library of reusable web components
- Conduct comprehensive **front-end testing** to ensure a seamless user experience across devices and browsers
- Maintain concise code documentation.
- Optionally contribute to smart contract or backend development as needed

Your Profile

- You are a team of **2-3 students**
- You have **experience in web development** with React, CSS, HTML (Redux, Bootstrap) and can work with Git, unit testing and RESTful APIs
- You are familiar with **UI/UX design** principles and Software Engineering Best Practices
- You are a team player, eager to learn new technologies and ask for assistance when required
- You are someone who can see a task through to completion and likes to take the **initiative**

Why join us?

- **Hybrid work environment:** Work from our vibrant Munich office at WERK 1 or remotely
- **Ownership and responsibility:** Take on challenges and own your projects
- **Direct impact:** Shape our FinTech's blockchain product and witness tangible results
- **Skill development:** Learn and grow with support from experienced professionals
- **Future opportunities:** Potential for continued employment as a working student or full-time
- **Mentorship:** Collaborate closely with seasoned founders from PIMCO, Berenberg, HSBC, Citibank, Credit Suisse

Application

- Start date: as soon as possible
- Please apply as a team
- Include your CV and 2-3 sentences about your motivation
- Send your application to johannes.schaaf@caplend.de
- We'll review your application and reach out to you shortly to schedule an interview call
