DEVELOPER WANTED

Campaign Concierge

Who we are looking for.

- Frontend Developer (Next.js)
- Backend Developer (Next.js)
- Crawler/Clickbot Programmer (Next.js)
- Algorithm Expert (Algorithm Enhancement using LLM)

Our Mission.

Small to medium-sized Amazon sellers struggle with onboarding and expanding their product offerings. Manual advertising optimization is costly, and Amazon's algorithm can be tough to navigate. Our digital services streamline product marketing, save time and money, and leverage our proven expertise. We provide simple yet effective tools to boost success on Amazon.

What's in for you.

- Work on innovative areas
- Responsible for your own projects
- Close cooperation with the founders
- Job offers with share compensation

Your IDP.

In this IDP you will contribute to the stabilization and further development of our Minimum Viable Product (MVP), a data-driven system for optimizing Amazon advertising campaigns.

You can work on a productive system, implement practical improvements and gain hands-on experience in algorithm driven optimization while learning directly from our experienced full-stack developers, benefiting from their procject expertise and insights.

The Project.

Analyze and improve algorithm functionality

Stabilize backend systems and optimize workflows

Develop new features using real-world data

Test, validate, and **enhance** a live MVP

Sounds good to you? Contact us.
