

Mobile Team Hub

CheckedInn

Our Mission

CheckedInn is a software startup on a mission to modernize the hospitality industry. We create digital solutions that empower small and mid-sized hotels with the tools they need to operate efficiently and deliver exceptional guest experiences.

Your task

Time Tracking & Break Management

Build a mobile module that lets staff clock in/out, log breaks, and view hours. Includes offline support, optional geofencing, and GDPR compliance.

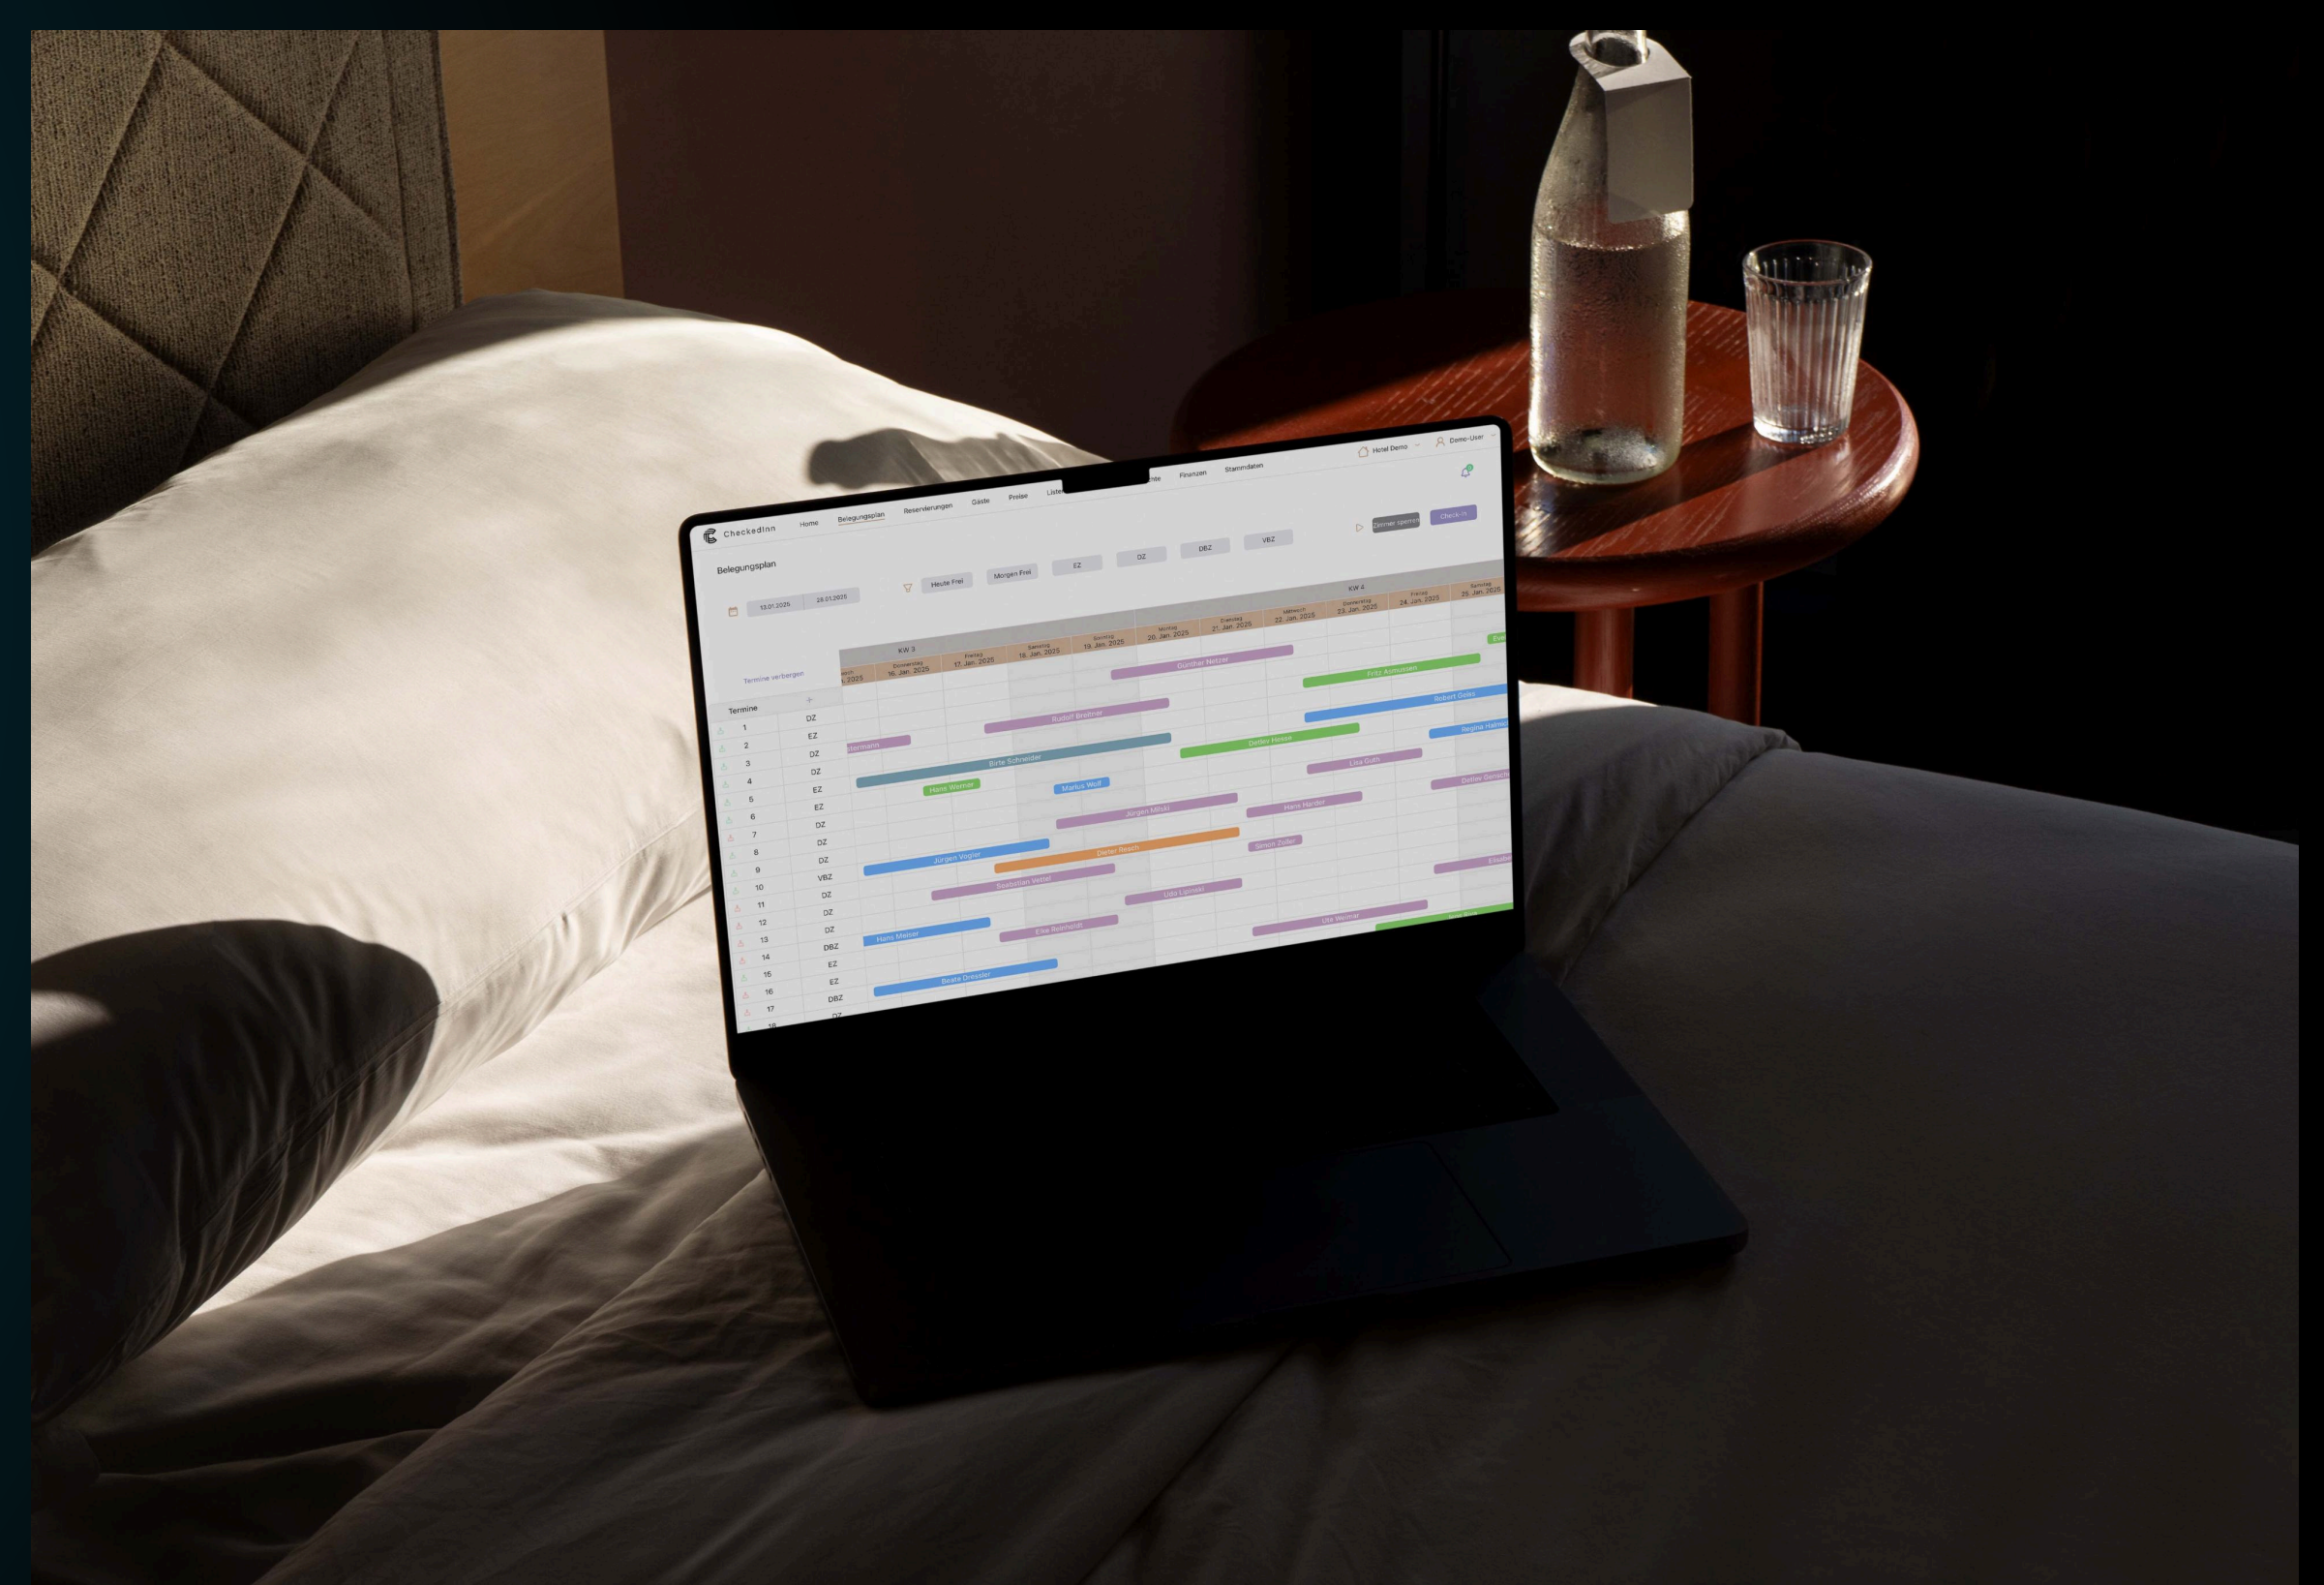

Digital Onboarding Flow

Create a digital onboarding process: data entry via form, validation, and auto-generation of an employment contract as PDF – secure and user-friendly.

Both modules will integrate into our hotel management system.

Recommended skills

- Experience in mobile app development (especially with Flutter)
- NodeJS or Python knowledge
- UI/UX skills
- SQL databases
- CI/CD knowledge
- Optional: AWS infrastructure
- Passion for agile, collaborative work
