IDP: Platform Development - Solar Startup

Your IDP at Voltaro

In your IDP at Voltaro, you will work on a major future topic for the expansion of renewable energies and sustainability in the building sector. You will gain insight into the process of developing an idea into a finished product.

- Work hand-in-hand with our product team and shape our product vision
- Develop a platform that enables easy access to solar in the commercial sector
- Bring your expertise to development and improve your skills
- Work in a fast-growing startup environment
- Flexible hours and remote work are possible

Who we are

VOLTARO is the first independent platform for commercial solar. We help companies analyze the solar potential of buildings, obtain competitive bids from vetted vendors, and profit from solar power effortlessly - by handling solar projects from planning to operation for our customers.

Your Tasks

- Evaluation and implementation of the right architecture for a customer-oriented platform (low-code or full-code)
- Design and construction of database structures
- Development of the platform according to a given roadmap
- Preparing user tests, data analysis and evaluations
- Build workflows, automations and interfaces between different tools

Your Backround

- Good understanding of database design, software architecture, and APIs
- Familiar with no-code/low-code tools or willing to learn
- English fluent, German is a plus

You can apply as a team or alone. Send us your CV and a few sentences about your experience to: andreas.just@voltaro.de
