

Rosenberger Hochfrequenztechnik – Business Development “Music Industry”

The family-owned Rosenberg Group is a world-wide leading manufacturer of connector solutions in the high-frequency and fiber optic technology fields. Our customers include renowned high-tech companies in cellular technology and telecommunications, data systems, medical electronics, industrial measurement technology, automotive electronics and electro-mobility fields. Headquartered in Germany, we successfully run a global network of manufacturing plants and sales offices with more than 15,000 employees. We invest strategically in the development of new high-quality products, in the most advanced manufacturing and business processes, in resource conservation and environmental protection. But particularly in our people: Their technical ability and their motivation are the future of the company.

The market study „Music Industry”:

We are currently involved in a R&D-project about how to connect musical instruments to mixing consoles in a simpler way. Today on festivals and concerts every instrument needs to be connected to the mixer at the right port, which is very time-consuming and cumbersome. We hold a patent on how to match the disordered micros to the right port at the mixer. The goal of this study is to get an overview over the existing technologies and to identify markets for our own technology as well as to find out which product specifications are necessary for potential customers.

We expect from you:

- Systematic collection and presentation of already existing technologies and markets
- Identification of necessary product specifications to meet customer needs in the future
- Identification of technical requirements for new markets

We offer:

- Deep insights into a successful international family business
- Exciting and multifaceted cooperation with a very experienced interdisciplinary team
- Salary
- Shape the company with your ideas and solutions and possibly join us, early on
