eco.mio

Fullstack Development - Climate Tech

IDP- Part Time or Fulltime

Who we are

We believe conscious consumption is key to a company's profitability and a more sustainable world. Therefore, we are committed to reducing the ecological impact of business travel by empowering entrepreneurial employees. To this end, we are developing a platform that incentivizes employees to make their business trips greener and cheaper.

We are located in Werksviertel in Munich, Zurich and Berlin and backed by the XPRENEURS, ETH juniors, Female Founders & digital hub Aachen. Good conditions to navigate full speed towards our product launch. Join the eco.mio journey!

What you can expect

- Support the founding team in the development and improvement of their product
- Develop your frontend (and backend) skills in a hands-on way, working closely on the most important features
- Develop and improve an existing web application and browser extension
- Improve your coding and software development skills through regular review and feedback

What we expect from you

- First (personal) project experiences and solid foundation of JavaScript or TypeScript
- Ideally also knowledge of Python and – the cherry on top - Django
- Self-initiative, you will get a lot of responsibility from day 1 and we expect you to see this as an opportunity to grow
- High motivation to actively contribute to a start-up's heart, which is our product

Why joining our journey now

Our work is defined by

- Trust We do what we say we do! We have confidence in each others' skills and feel comfortable to open-up.
- Drive & Dedication We are ambitious, proactive and motivated! We work with passion and commitment towards our common goals.
- Responsibility We do the right things right! We take care and are accountable for our actions towards our team, the society and our precious planet.
- Continuous Learning We live a failure culture! We support each other in steady development through pushing comfort barriers and giving honest feedback.
- Freedom We have inspiring lives! We support flexibility to allow creative brilliance and to maximize our productivity and well-being.

We offer internships & working student positions upon successful completion of the project. We are excited to get to know you!
