DevOps Engineering IDP

About Cartken

Cartken is a startup founded by former Googlers, revolutionizing mobile robotics, with delivery robots currently deployed in LA, Miami, San Francisco and Tokyo. The headquarter is in Oakland, CA. Software development happens in Munich.

If you don't find anything matching to your interests (or can't do an IDP, internship or thesis just now), but would still like to be part of our team and mission, don't hesitate to reach out.
To apply or to get in touch just send an email: lennart@cartken.com

Your task

- Manage our CI/CD pipeline and cloud infrastructure

- Handle problems and provide solutions

- Help to design and implement new CI/CD processes

- Infrastructure Engineering

  - Streamline the infrastructure setup on our vehicles

  - Driver installation and hardware interfaces

- Implement operational support functions

  - e.g. cloud link for data up/download

Your profile

You

- ... have fun at automating processes

- ... are curious to dive deep into new topics

- ... want to go the extra mile for providing the better user experience

- ... have experience with infrastructure as code (IaC)

- ... have experience with ROS (optional but highly beneficial)

- ... like to get hands on experience with mobile robotics

- ... would like to be part of a talented, fast paced team
