IDP: Development of OAuth Integrations

16 ECTS

bumpee is looking for motivated TUM students to support us in the development of our CRM software for customers. The focus for this IDP is on connecting existing employee data management systems via OAuth.

🏢 SaaS Startup   📇 OAuth   🗄 API Integration

Objective:

Connect third party databases (such as Azure Cloud etc.) to our web application via OAuth interfaces.
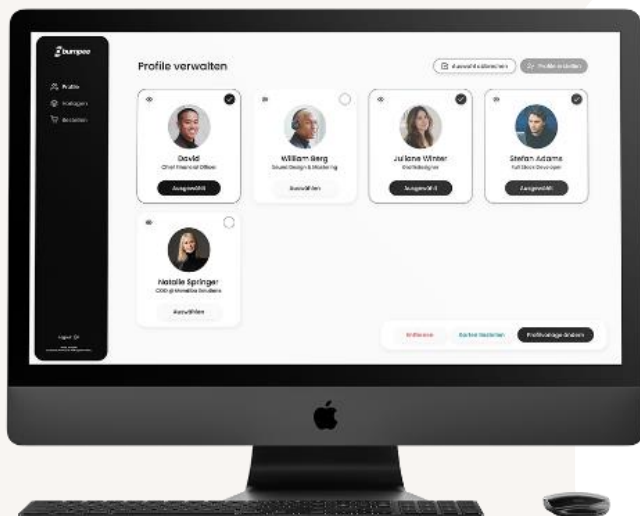

- **Start:** As soon as possible
- Regular 1:1 with our developers
- If you want, you can work at our office at Schwanthalerhöhe (not mandatory)
- **You can also apply as a team**
- We have a TUM-supervisor for you

Skills:

- React
- experience in interface integration (REST)
- Basic understanding of Web-Security
- Git

Disclaimer: you need to be enrolled at TUM. Not a working student position.

About bumpee:

Our goal? Getting rid of paper business cards. bumpee offers companies a SaaS Tool to better create, manage and track new physical connections. This way we safe companies money and increase their productivity while creating more lasting and sustainable leads.

Interested? Write us in a few sentences why you want to apply!
