

// IDP

Research & Software Engineering Program

As part of your IDP join a 4-month Research & Software Engineering Program with **convaise** and gain hands on experience in research, development and combination of software engineering with real world business problems - from problem statement to end-to-end prototype.

The topics include frontend, backend and fullstack development problems. The program involves the conceptualization and development of end-to-end prototypes and their integration into our productive systems.

 4 Months

 Refine research and development skills

 Certificate on successful completion

 Team or individual
