

# klair your mind with self-therapy.

Klair

## Tech/AI @ VC-backed mental health start-up

### Quick facts

 Name	 Tags
 Location	Berlin Remote
 Start	ASAP Summer Term
 Employment Type	IDP student
 Area	AI Data Science Machine Learning Tech
 Duration	3 months 6 months

### Our Mission

**Our mission is to improve people's mental health at scale without any stigma. We believe the first step towards democratised mental health is to reduce cost-barriers and scarce human resources by helping people to help themselves. We do that by combining tech with human voice to start a new era of self-therapy.**

## **Current opportunity**

With the first funding we are currently building the first MVP to test and validate our idea further. There are a lot of things to do, some of what you can help us with are:

- Design and build MVP
- Test out different features closely with users
- Build front-end Native App
- Build interconnection with external communication platform

## **What you should bring**

- Basic experience with back-end and/or front-end development
- Knowledge in Prototyping, Design, UX, UI
- Possibly have prior knowledge or great interest in AI
  
- Excited about lean start-ups, teams and innovation
- Comfortable with taking ownership
- Ideally Berlin-based, otherwise remote

## **About us**

**Celina**  
Co-Founder
