

Business development – Robotics

About us

NEDGEX is the corporate venturing unit of the NETZSCH group. As a family-owned business, we are dedicated to further growth – making it diverse and future proof for the next generation. We invest in visionary startups as a strategic investor. We build ventures in disruptive innovations by leveraging NETZSCH competences, know-how and market access.

About you

- TUM School of Management students with a strong interest in innovation & technology
- Proactive, responsible, and reliable team player
- Fluent in English, German is a plus
- Experience / interest in start-ups & entrepreneurship is a plus

About the Project Study

Robotics is advancing quickly and becoming more accessible. We see potential for efficiency gains and new business around NETZSCH's core activities. Your task is to gather, evaluate, and validate the potentials of robotics.

- 1. Understanding the potential use cases of robotics:** Identify NETZSCH's current challenges, processes, and applicable robotics technologies.
- 2. Evaluating the use cases for robotics application and NETZSCH and for other businesses:** by using defined criteria, evaluate the use cases in their potential considering robotics technology, efficiency gains, market expansion potential.
- 3. Propose your recommendation to higher management**
