

Our innovation analytics platform helps global technology leaders create and prevent strategic surprise.

Large technology organizations and investors worldwide use Mergeflow to discover products, research, patents, start-ups, and experts associated with emerging, innovative technologies. Our customers operate in and across diverse industry sectors.

Effective immediately, we are seeking an

## Embedded Analyst (m/f)

### The challenge

In addition to our analytics software platform, we provide our customers with direct analyst support. Our customers are global technology leaders. We would like to help them implement their innovation intelligence strategies by providing the best support possible. This sometimes includes embedding our analysts with our customers' innovation and technology teams.

### You

- From day one, you want to have an impact, and help our customers get the most out of our analytics software platform.
- You view "creative" and "quantitative/analytic" as two sides of the same coin.
- You have no fear of coding. To you, writing code is a great way of testing new ideas and hypotheses.
- You love to communicate your ideas and findings with people from various backgrounds, from scientists to marketing professionals.
- You are curious and enjoy immersing yourself in a broad range of topics at the intersection of technology and business.
- You like working in a team that values competence above job title.

This is a part-time position. If you are currently enrolled as a (university) student, we particularly encourage you to apply. The position will be based with one of our customers in Munich (Germany).

We look forward to hearing from you at [careers@mergeflow.com](mailto:careers@mergeflow.com)
